Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-61 and 64-68, drawn to a device inspection apparatus and its method including a first and second marker position measurements and a metrology unit comparing the measurements, classified in class 250, subclass 221.
- II. Claims 62 and 63, drawn to a metrology unit including a translatable carrier and a detector array for detecting diffracted light, classified in class 250, subclass 216.

The inventions are distinct, each from the other because:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, each of the inventions I and II has separate utility such as stated above. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
